JESSE W. TAPP, M.D., M.P.H.
Director of Public Health

Mark Lucas, Coordinator
Land Reclamation
METRO
821-2nd Avenue
Seattle, WA 98104

Dear Mark:

We have completed review of your Land Utilization of Sludge permit application and evaluation of previous site inspections of the sludge spreading areas. Based on the information collected and consultation with the Washington State Department of Ecology - Northwest Regional staff, your sludge utilization permit application has been approved under the following condition:

We have no records or information concerning the chemical constituents in the digested sludge from your Alki treatment plant. Also your permit application did not include any data as requested under item 4, page 2.

Therefore, would you please submit a copy of your most recent chemical analysis of Alki plant sludge by September 30, 1983. If you do not have this information, an analysis should be scheduled immediately and results forwarded to us no later than November 15, 1983.

Your 1983 Land Utilization of Sludge permit is being enclosed for posting. Environmental Health Specialists continue to make periodic site inspections of your operation.

If you have any question(s) or would like additional information please call Wally Swofford at 587-2722.

Sincerely,

John P. Nordin
Chief of Environmental Health Services
